

# Retro Computing Roundtable

... the show where everything old is news again.

Gather 'round a virtual table where today's talk is about yesterday's computers. Join the irregular regulars Paul Hagstrom, Michael Mulhern, Jack Nutting, Earl Evans, and Carrington Vanston and get the skinny from the world of vintage computer hobbyists, collectors, enthusiasts, and old school geeks. We cover modern day vintage tech events, new developments for old hardware, the revival of retro tech, the best of 8 bit culture, and take many strolls down memory lane.
